PROFESSIONAL PROFILE

CompTIA Security+ and Microsoft Azure Fundamentals certified professional with hands-on Microsoft Applied Skills experience in Active Directory administration, Group Policy, Azure security and monitoring. Configured domain controllers, users, groups and organisational units in assessed labs, with further training in Entra ID, RBAC, Conditional Access and Microsoft 365 administration. Brings 12+ years' experience working with sensitive information, regulated procedures and customers, alongside practical secure-cloud integration work.

RELEVANT ADMINISTRATION AND SECURITY SKILLS

Hands-on in Microsoft Applied Skills labs: Active Directory Domain Services, user/group/OU administration, Group Policy Objects, domain controllers, Azure Firewall, Key Vault, Azure Monitor, Defender for Cloud, Just-in-Time VM access and Log Analytics.

Additional training and exposure: Microsoft Entra ID, Conditional Access, identity protection, Azure RBAC, Defender XDR, Microsoft 365 administration, Zero Trust and Azure Network Security Groups.

Professional strengths: Accurate record-keeping, confidential data handling, customer support, risk awareness, clear explanations and cross-team communication.

CERTIFICATIONS AND ASSESSED MICROSOFT SKILLS

CompTIA Security+ (Apr 2026) | Microsoft Certified: Azure Fundamentals, AZ-900 (Sep 2026) | IBM SkillsBuild Cybersecurity Fundamentals (Mar 2026)

Microsoft Applied Skills: Administer Active Directory Domain Services | May 2026

- Configured a working AD DS environment with domain controllers, users, groups, organisational units and AD objects.
- Created and applied Group Policy Objects to enforce centralised security and administration settings.

Microsoft Applied Skills: Get Started with Cloud Security and Monitoring Tasks | May 2026

- Configured Azure Firewall, Azure Key Vault and Azure Monitor to support resource protection, secrets management and monitoring.

Microsoft Applied Skills: Secure Azure Services and Workloads with Microsoft Defender for Cloud Regulatory Compliance Controls | May 2026

- Reviewed security recommendations and vulnerabilities, including network/endpoint exposure; configured Just-in-Time VM access and used Log Analytics.

PROFESSIONAL EXPERIENCE

Founder | Local Edge Tech (ProAnswerAI) | 2025 - Present

- Designed and deployed AI voice-agent solutions using ElevenLabs, Vapi and Azure/AWS; worked with secure API integrations, IAM/RBAC and HTTPS/TLS.
- Assessed legacy codebase vulnerabilities and considered data protection obligations as an ICO-registered data controller.

Car Finance Account Manager | Vizion Autos | Oct 2024 - Mar 2025

- Handled sensitive financial information within FCA/GDPR procedures and identified potential fraud indicators during lead qualification.

Life Insurance Adviser | LifeSearch | Jul 2024 - Oct 2024

- Maintained confidential customer records, explained complex insurance terms and worked within FCA and data protection requirements.

Automotive Sales Executive (multiple dealerships) | Oct 2013 - Jun 2023

Sytner BMW (Dec 2018 - Jun 2023); Stephen James BMW (Oct 2017 - Dec 2018); Audi (Jun 2016 - Aug 2017); Lexus (Oct 2015 - Jun 2016); Vauxhall (Oct 2013 - Oct 2015).

- Managed sensitive customer records, FCA-related documentation, CRM follow-up and relationships across regulated vehicle sales.

Sales Consultant, Fire & Security | ADT Fire & Security PLC | Jan 2012 - Aug 2013

- Advised customers on physical and electronic security, including alarm monitoring and access-control solutions.

OTHER SECURITY PROJECTS AND TECHNICAL DEVELOPMENT

ISO/IEC 27001:2022 GRC & ISMS | simulated project

- Mapped controls to security risks and evidence; produced an asset inventory, Statement of Applicability, incident response documentation, internal audit and management review records.

DirtyPhish | Cybersecurity Arcade & Knowledge Hub

- Created a public interactive security-learning platform, including scenarios about identity, phishing and other defensive security concepts, with educational articles.

Additional GRC portfolio | GitHub

- Built NIST AI RMF, ISO/IEC 42001 and EU AI Act simulated compliance projects involving risk assessments, control documentation and governance evidence.

PLATFORMS, ADDITIONAL TRAINING & EDUCATION

Microsoft Entra ID, Active Directory, Azure, Microsoft 365, Defender technologies, GitHub, Excel/Google Sheets and Google Workspace. 40+ hours of Microsoft security, identity and administration learning.

AVCE Advanced Business Studies (A-Levels); 10 GCSEs including English and Mathematics (grade C or above).
