KOFI EUGENE AMANQUAH

ENTRY-LEVEL CYBERSECURITY & IT

GRC & Information Security | Identity & Access Management | IT Administration

London, UK | 07795 075 911 | ekamanquah@hotmail.com

LinkedIn: kofi-eugene-amanquah | GitHub: K0-Cyber | dirtyphish.com

PROFESSIONAL PROFILE

CompTIA Security+ and Microsoft Azure Fundamentals certified professional seeking entry-level roles in GRC, information security, IAM and IT administration. Brings 12+ years of experience in regulated, customer-facing industries, handling sensitive information and following FCA and data protection procedures. Practical development includes four simulated GRC projects and assessed Microsoft labs in Active Directory, cloud security and monitoring, supported by clear communication and accurate record-keeping.

CERTIFICATIONS

CompTIA Security+ | April 2026
Microsoft Certified: Azure Fundamentals (AZ-900) | September 2026
IBM SkillsBuild Cybersecurity Fundamentals | March 2026

PRACTICAL CYBERSECURITY PROJECTS

The four GRC projects below use EugTech Solutions Ltd, a fictional consultancy. Each heading links to its GitHub repository.

ISO/IEC 27001:2022 | Information Security Management System

Built ISMS documentation for a simulated 50-person consultancy covering cloud services, managed services and internal IT. Defined scope and assets, assessed risks and mapped treatments to Annex A controls. Produced a risk register, Statement of Applicability, incident response and continuity procedures, plus internal audit and management review records.

NIST AI RMF 1.0 | Customer-service chatbot risk assessment

Applied GOVERN, MAP, MEASURE and MANAGE to the simulated EugAI chatbot. Assessed prompt injection, hallucination, privacy and bias risks; documented treatments and red-team and bias assessments. Produced a requirements traceability matrix linking framework requirements to controls, supporting evidence and implementation status.

ISO/IEC 42001:2023 | AI Management System

Developed an AIMS for a simulated consultancy using AI in client delivery and internal operations. Defined scope, policy and accountability; completed AI risk and impact assessments and selected Annex A controls. Produced a Statement of Applicability, audit and management review records, and a continual-improvement plan to document governance and follow-up actions.

EU AI Act | Chatbot compliance assessment

Assessed the simulated EugAI chatbot to identify its risk tier and applicable obligations. Documented its limited-risk classification, Article 50 transparency requirements and gaps for a hypothetical high-risk use case. Produced a user-facing transparency notice, compliance checklist, GPAI provider due diligence and incident reporting procedures.

DirtyPhish | Independent security-learning platform

Created a public learning platform with original interactive games and educational articles explaining phishing, identity, cloud and defensive security concepts to non-technical audiences. dirtyphish.com

PRACTICAL IAM & CLOUD LABS | MICROSOFT APPLIED SKILLS

Assessed Microsoft labs completed in May 2026.

Administer Active Directory Domain Services

• Configured domain controllers, users, groups and organisational units; created and applied Group Policy Objects for centralised security and administration settings in an assessed lab.

Get Started with Cloud Security and Monitoring Tasks

• Configured Azure Firewall, Azure Key Vault and Azure Monitor for resource protection, secrets management and monitoring.

Secure Azure Services and Workloads with Microsoft Defender for Cloud Regulatory Compliance Controls

• Reviewed security recommendations and vulnerabilities, including network and endpoint exposure; configured Just-in-Time VM access and used Log Analytics.

Credential history: learn.microsoft.com/en-gb/users/kofiamanquah-6436/

PROFESSIONAL EXPERIENCE

Founder | Local Edge Tech (ProAnswerAI) | 2025 - Present

• Designed and deployed AI voice-agent solutions using ElevenLabs, Vapi and Azure/AWS, working with secure API integrations, IAM/RBAC and HTTPS/TLS.

• Assessed legacy codebase vulnerabilities and considered data protection obligations as an ICO-registered data controller.

Car Finance Account Manager | Vizion Autos | Oct 2024 - Mar 2025

• Handled sensitive financial information within FCA/GDPR procedures and identified potential fraud indicators during lead qualification.

Life Insurance Adviser | LifeSearch | Jul 2024 - Oct 2024

• Maintained confidential customer records, explained complex insurance terms and worked within FCA and data protection requirements.

Automotive Sales Executive | Multiple dealerships | Oct 2013 - Jun 2023

Sytner BMW (Dec 2018 - Jun 2023); Stephen James BMW (Oct 2017 - Dec 2018); Audi (Jun 2016 - Aug 2017); Lexus (Oct 2015 - Jun 2016); Vauxhall (Oct 2013 - Oct 2015).

• Managed sensitive customer records, FCA-related documentation, CRM follow-up and customer relationships across regulated vehicle sales.

Sales Consultant, Fire & Security | ADT Fire & Security PLC | Jan 2012 - Aug 2013

• Advised customers on physical and electronic security, including alarm monitoring and access-control solutions.

ADDITIONAL TRAINING & EDUCATION

40+ hours of Microsoft Learn training covering Entra ID, Conditional Access, RBAC, Defender XDR, Microsoft 365 administration and Zero Trust.

AVCE Advanced Business Studies (A-Levels); 10 GCSEs including English and Mathematics (grade C or above).

GitHub, Markdown, Excel/Google Sheets, Microsoft 365 and Google Workspace.
